Customers of Laird Product MTTC-1410

RE: MTTC-1410/520082-02 Obsolescence

To Whom It May Concern:

Laird has recently made the determination that the bench top temperature controller, product number MTTC-1410 (PN 520082-02), will no longer be part of our product offering and sales will be discontinued immediately.

The design of this legacy bench top temperature controller is out dated for the needs of today's market, functionality is limited and sales have been underperforming for several years. Therefore, Laird has decided to obsolete the product. The MTTC-1410 product has been removed from our brochures and website and we have cancelled all open orders.

We are focusing resources on our newer microcontroller based controllers that can drive the full spectrum of our TEA product line, reference link below.

<http://www.lairdtech.com/product-categories/thermal-management/temperature-controllers>

Otherwise some controller options are mentioned below. Please note that they may not be direct replacement for MTTC-1410 and the customer will have to verify the suitability for their specific application.

1. Oven Industries (5R6-900 Benchtop Temperature Controller) www.ovenind.com
2. Danfoss www.danfoss.com
3. Omega www.omega.com
4. M-system www.m-system.com
5. West Control Solutions www.west-cs.com

Laird apologizes for any inconvenience this may cause to you or your customers.

Regards,

Joanne Mayo
